In fact the owner of a dog deemed only a freak of nature, I cut a together. - Science. good-sized branch from the bush and shook the roses over my handkerchief to catch the crimson dew. The branch withered in my hand in a very few minutes, the sap becoming so foul with an odor of animal corruption as to be unbearable, so I was obliged to throw it away; but I carried the stained handkerchief to Dr. N-, a prominent physician of this city, who is also a fine chemist, and asked him to determine the nature of the fluid. I told him all I knew concerning the roses, and was, of course, believed by him, but upon calling for the handkerchief the next morning was accused by the doctor of trying to hoax him.

"What made you tell me that cockand-bull story about that rose bush? Why, man, you knew it was blood on that handkerchief. My microscope revealed it at once, although there is something about it I can not understand in the least-a corruption and yet a life. However, it is only blood, and human blood at that!"

I assured him I had only told him the truth about the rese-bush on that lonely grave, extraordinary as that truth might seem. On hearing this he hurried me off to the spot. It was still early enough for the dew to yet remain on the grass, and the roses to be heavy with that horrible moisture. Dr. N-- examined it closely, and came to the same conclusion that I had, that some deed of blood was thus revealed, and that the victim of the deed slept in the grave beneath. This we believed, although both of us had hitherto been scoffers of all belief in supernatural occurrences. We returned to town and procured a couple of men to assist us in opening the grave, which we did at once. Judging by the absence of remains of wood or metal, without coffin, and beneath a shallow covering of earth, lay two skeletons, one that of a woman-a young one, Dr. N- said-and the other that of a few months' old child. A long, tapering knife, such as a Mexican bravado carries, pierced the Mexican bravado carries, pierced the temples of the infant, and from its Wide Awake. position must have pinned it to the bosom of the mother. No clew was found as to the race, name, or aught else, so we reinterred the pitiful remains and burned that bleeding bush. -Fort Worth (Tex.) Cor. Globe-Democrat.

RIGHTS OF LAND-OWNERS.

Few Words About the Fence Question and the Dog Nuisance. The owner of land has rights which should be respected as much as the What a man purchases and pays for with the proceeds of his own labor should be held inviolable, in whatever house of another man and should not need costly protection to preserve it from trespass and damage by other persons. Hence a garden or a field of corn should no more be required to be fenced for protection against wandering stock than any house should be fortified with stone walls and barred windows to keep out tramps and thieves. And inasmuch as this was at one time an incident of lawlessness and semi-barbarity, when every man's hand was lifted against his fellow who owned any thing desirable to the lawless robber, so now it is an incident of equal lawlessness and barbarity that a man's crops should be overrun and destroyed

by the cattle of his neighbors unless

more than the value of these cattle is

spent in fencing them out.

Pastures only need to be fenced for the purpose of taking care of the farm many cases the relief from the cost of making and keeping up fences would be the difference between poverty and pecuniary ease. No doubt the other benefits resulting from such a just and proper system as economy of land, condition and make his life more then add half a pint of water and one pleasant. Study Your Animal.

Now let us reason together. You and we have been farmers all our lives. We were born on a farm. We have seen animals from our earliest infancy; we have seen how father managed them, and we know how we have managed them since we were old enough to care for them. Now, how much real hard study have we ever known expended upon the training of animals-expended in the direction of making the colt or calf more valuable.

Many who read these lines may be an exception, but is it not the fact that the average man lets his animals grow up about as thousands let weeds grow in the fence corners? You and we have known balky horses and kicking cows. Perhaps we have never taken the trouble to inquire the cause of this result in any particular instance. If we had ten chances to one if we should not have found that it was an ill-natured, injudicious driver horses," said a well-dressed man who who made the balky horse and a kickdrove up to a Bucks County farmer the | ing man who made the kicking cow. Like Topsy, in Uncle Tom's Cabin,

There is nothing that the average expend some hard study upon the coming the objectionable ones and strengthening those that are desirable. Animals differ just as people differ. Much can be done to train out the objectionable features of a child's nature, and the same is true with the young animal. It is in the early days of ex-"Another man has bargained for istence, whether it is a human being into a decent cow if we are willing to spend the time in aiding it. practice one essential thing, and that

-Thin seeding often gives nearly the bulk of the thick seeding, and of vastly better quality, even when the season favors that thickly sown. If a drought comes on, the corn covering in their shrill repetitions the master's charge of their owners and not be sufduty is first to admonish, and, if this fered to trespass on the property of nearly worthless. That put in so that the horse and cultivator can run through it keeps growing, and will bear more or less ears. Even this, superior as it is to sown fodder corn, is not equal in feeding value to the corn grown far enough apart in rows to bear a full crop. The stalks that have borne a full ear are richer than orayers are over, the voice of the art- chief. This is bare justice.—N. Y. those that only bear a nubbin, unless the latter is also thrown in.

TREATMENT FOR HOGS.

Saltpeter the Main Remedy for Most Dis-

eases of Swine.

Saltpeter thins the blood and allays fever. Spirits of turpentine is healing to the lungs and fatal to typhoid symptoms. A teaspoorful of saltpeter and the same quantity of spirits of turpentine in each barrel of swill is a good thing for well hogs in a district where there is any liability to hog plague. If any symptoms of sickness occur increase the dose to a pint of saltpeter and half a tea-cup of turpentine to each barrel of swill, and if it does not stop at that give all they can be made to take in their swill. One year, while feeding over a hundred shotes, they were taken with cholera, or hog plague. I say hog plague because the disease did not always assume the same form. Hogs will generally purge in the last stages of almost any fatal disease, so purging and vomiting is not always the beginning, but frequently the ending, or last stages of the disease. In nearly all cases I find fever. The blood thickens and sometimes the hogs are costive. They almost always cough more or less, according to the severity of the disease. They frequently have blind staggers, will turn round and round, run against buildings or fences, and sometimes travel in every direction as far as the limits of the pasture will allow, until within a few minutes of death. Sometimes they have quick, irregular breathing like a horse with the thumps. Again, their eyes will protude. An internal examination generally shows the lungs and midriff, together with the whole lining of the chest, seriously affected. The whole alimentary canal is affected something as the human being is affected with typhoid fever. I experimented a long time before I came to the following

conclusion as to remedies: A have given a 2-quart pailful of saltpeter in rich swill to 100 sick shotes, and it benefited them at once. If the hog gets so sick he will not is kindness; and if we all practice kind- drink the swill, let two men hold him on his back and, forcing his mouth open with a stick, put half a teacupful of pine tar, mixed with a heaped tablespoorful of pulverized saltpeter down the animal's throat. Then make a tablespoonful of turpentine follow it and anoint the neck and chest of the patient with a teacupful more of the the same fluid. I have cured hogs worth \$20 apiece. Sometimes the treatment has to be repeated the sec--Currant preserve is made of equal ond time. Three men can dose 100

THE ROCK ISLAND'S POSITION. General Manager St. John's Reply Statement of Alton Officials.

[From the Chicago Times.] General Manager St. John, of the Chicago, Rock Island & Pacific road, authorizes the following statement in reply to assertions recently made by Vice-President J. C. McMullin of the Chicago & Alton in a pubished interview;
"Mr. McMullin, in a recent published inter

view, has clearly defined the present posi-tion and policy of the Alton road. It is to 'insist on through rates being made on a basis that will give to it a fair share of the traffic which goes to and comes from points west of Kansus City. He illustrates his meaning by citing a shipment of live stock from Topeka on the Rock Island road through Kansas City to Chicago. Upon such a shipment the tariffs of all the lines as heretofore adjusted provided for a through rate somewhat less than the sum of two locals. This practice was in accordance with well recognized principles of rate-making as universally practiced by carriers, and has been approved by the interstate commerce commission, which in a recent case used the following language: 'As through rates are made by the language: 'As through rates are made by the American system of roads, agreed percent-ages of the total rate, considerably less in amount than the local rates of roads receiving such percentages, are usually a leading feature, and it is eminently proper as a general rule that this should be so. * * * Commerce and trade require it and competitions. tition compels it. Such rates, when reasonably and fairly adjusted to local business, are greatly favored in the law, because they furnish cheapened rates and greater facilities to the public, while at the same time they give increased employ-ment and earnings to a larger number of

"In the rates as adjusted heretofore upon live-stock traffic from points in Kansas, Indian Territory, Texas, etc., through Kansas City to Chicago, the difference be-tween the sums of the locals and the tween the sums of the locals and the through rates was an entirely reasonable difference, and the tariffs in question were precisely upon the line of the resolution which Mr. McMullin quotes approvingly. Notwithstanding this, he says that he proposes to get what he calls a 'fsir share of the tariff by reducing the local rate from Kansas City to Chicago to the amount of the proportionate rate between these points charged by the Rock Island on the through shipment. through shipment

This statement is certainly candid. His line has no extension west of Kansas City. The Rock Island has. He proposes to make the latter divide with him traffic which originates upon the extension that it has furnished means to construct and this he will do by reducing the established rate Kansas City to Chicago. This declara tion follows his announcement at the com mencement of the same interview that 'the Alton does not cut any rates; it only reduce when necessary to meet cut rates of other roada' Yet the Alton has just forced large reduction in all rates on live stock and products from Kansas City to Chicago in accordance with the policy above stated. "Naturally and inevitably when the Altor reduces its rate from Kansas City to the division of the through rate charged upon the lines where the live-stock shipments originate those lines must meet the reduction in the local and at the same time re-duce their through rate correspondingly. This is necessary for their preservation they will not think that they can reasona bly be asked to 'cut their lines in two' for the benefit of the Alton, nor can the latter justly expect them to surrender traffic which they have constructed long lines of road to secure. This step will apparently involve a new reduction by the Alton to the level of the new proportionate rates; and the process will be repeated until all the lines are doing business at a loss and somebody surrenders.

"The association has no desire to punish the Alton for its withdrawal nor for any tection of its lines against the Alton's raid will probably be taken however." THE Sultan of Zanzibar has a German

HUBBARD BROS., 210 North 3d Street, St. Louis. Summer Weakness

Is quickly overcome by the toning, reviving, and blood purifying qualities of Hood's Barsaparilla. This popular medicine drives off that tired feeling and cures sick headache, dyspepsia, scrofula, and all humors. Thousands testify that Hood's Sarsaparilla "makes the weak strong."

"My health was peor, as I had frequent sick headaches, could not sleep well, did not have much appetite, and had no ambition to work. I have taken less than a bottle of Hood's Sarsaparilla and feel like a new person." Mrs. W. A. Turner, West Hanover, Mass.

N. B. If you decide to take Hood's Sarsaparilla, do not be induced to buy any other.

THERE has not been an execution of a Hood's Sarsaparilla Sold by all druggists. \$1; six for \$5. Prepared only by C. I. HOOD & CO., Apothecaries, Lowell, Mass. 100 Doses One Dollar
